OLGA FILIUSHKINA

FRONT END WEB DEVELOPER

I channel my interests in visual communication and computer technology to find creative solutions and bring my ideas to life on the web. Coming from a science background I have strong technical communication skills, and I pride myself in writing clean modular code. I aim to build socially responsible apps that put user experience and accessibility to the forefront.

PROJECTS

Worm's Eve View
JS | HTML | CSS
Live Repo

Dig up artifacts as you take on a role of a worm from future. The app randomizes the position of artifacts on the dig site built with HTML Canvas, keeps track of found items and shows associated text when they are clicked on.

Analog
React | Firebase
Live Repo

This app is a creative exercise that gives you a prompt to sketch, and allows you to share your art in a public gallery. The drawing pad is using HTML Canvas, and the gallery is stored in Firebase Realtime Database
